

Plastic Surgery procedures are divided into two groups, **cosmetic** and **reconstructive**.

Cosmetic surgery is performed to reshape normal structures of the body, improving a patient's appearance. Reconstructive surgery is performed on abnormal body structures, including those deformed by or lost due to cancer, injury, or birth defects. Reconstructive procedures are designed to improve function as well as appearance. Reconstructive surgery is commonly covered by most insurance plans.

Plastic Surgery

The name comes from a Greek word, "plastikos," referring to shape or form.

Star Valley Medical Center and Plastic Surgery of Jackson Hole provides care for patients from a wide geographic area, including Jackson Hole, Star Valley, central and western Wyoming, eastern Idaho, southern Montana, as well as national and international visitors.

Financing for cosmetic and reconstructive procedures is available and can be arranged through www.carecredit.com

John C. Payne, D.O.

Safety and comfort of every patient are priorities at Star Valley Medical Center. We are a fully-accredited surgical facility with state of the art equipment and exceptionally trained staff. Emergency care of facial injuries is provided in the Emergency Department at Star Valley Medical Center. Less invasive procedures are treated in Jackson, in Dr. Payne's office located inside Plastic Surgery of Jackson Hole.

Dr. John Payne is the only full-time plastic and reconstructive surgeon in northwestern Wyoming. Dr. Payne is board certified in Plastic Surgery by the American Osteopathic Board of Surgery. He graduated from the Philadelphia College of Osteopathic Medicine in 1987. Following a one year internship and three years of general surgery residency, Dr. Payne completed his training in plastic and reconstructive surgery residency in Des Moines, Iowa. He practiced in northern Ohio for nine years prior to his move to Wyoming.
